

### What is an agribusiness minor?

The agribusiness minor serves students with majors in other fields who are interested in careers in agriculture-related businesses. The minor teaches business principles in the agriculture industry and prepares students to work in food, fiber, and natural resources-related businesses and governmental agencies.

### How can I use an agribusiness minor?

The Agribusiness minor provides a solid foundation in agricultural economics, management, marketing, and more. You will understand the characteristics, challenges, and opportunities related to agricultural-based businesses and can be a leader in:

- Agricultural sales
- Commodities brokerages
- Production supply chain management
- Agricultural marketing and management
- Agricultural loan and finance
- Food processing
- Farm and ranch operation management
- Crop insurance and farm service

Learn from today's innovators of science and business, who are devoted to supporting the growth and development of the renowned scientists and entrepreneurs of tomorrow.

AGR 101: Introduction to Animal Science

AGR 102: Introduction to Plant Science

AGR 220: Introduction to Agricultural Economics

AGR 320: Agriculture Marketing

AGR 412: Agribusiness Management

ACC 246: Principles of Accounting I

## About Us

### Our Faculty

Our diverse faculty and staff have real-world agriculture and science expertise to increase your knowledge and experience during your college career. The staff and faculty are committed to using their time, talents, and intellectual resources to mentor you to success.

### Our Students

Graduates are not only obtaining key roles in traditional for-profit enterprises but also serving in humanitarian, ministry, and governmental organizations around the world in pursuit of their lifelong career goals.

### Facilities and Skills Development

Students have the opportunity to gain practical experience by visiting farms, research laboratories and companies, and by participating in projects, attending conferences and talking to business leaders. Additionally, students will increase their involvement through classroom activities, internships, Ag club, collegiate FFA Chapter, and corporate-sponsored student organizations. An Agribusiness minor experience will further develop leadership, team, and communication skills and other positive attributes of students.
