

Currently, as a full professor at Lincoln University, Dr. Manzoor E. Chowdhury's extensive research and academic career is marked by a profound commitment to understanding and addressing the complexities of applied economics, with a particular focus on sustainable development, poverty-environment nexus, and the impacts of corporate and governmental policies on economic stability. His academic journey began with a Ph.D. in Applied Economics from Texas A&M University, leading to over two decades of combined experience in teaching, research, consultancy, and notable contributions in both the private sector and higher education.

Dr. Chowdhury's research explores critical areas such as the implications of foreign direct investments in developing countries, specifically Bangladesh, and the role of corporate earnings reports in enhancing business education. His work on judgmental adjustments to forecasts in the new economy and the analysis of U.S. recessions provides significant insights into contemporary economic challenges and solutions. This scholarly work not only advances academic knowledge but also offers practical frameworks for addressing real-world economic and environmental issues.

Dr. Chowdhury has played a pivotal role as a co-investigator in projects funded by prestigious institutions like the USDA National Institute of Food and Agriculture (NIFA), focusing on enhancing food security, sustainability, and improving the profitability of small farms through innovative agricultural practices. These projects underscore his commitment to leveraging academic research for societal benefit, particularly in the realms of food security and sustainable agricultural practices.

Moreover, Dr. Chowdhury's excellence in academic and applied research has been recognized with various honors and awards. Notably, his dissertation received the Outstanding Dissertation Award from the Universities Council on Water Resources (UCOWR). Additionally, his work has been acknowledged with Best Paper and Best Presenter Awards at prestigious academic conferences, highlighting the impact and relevance of his research within the academic community and beyond.

Beyond his research, Dr. Chowdhury's professional activities and community service reflect his commitment to applying economic theories and findings to real-world challenges. Whether through his role in advising on curriculum and assessment for higher education institutions, engaging in discussions with business leaders, or actively participating in initiatives to support refugees, his work transcends traditional academic boundaries. These efforts demonstrate his belief in the power of economic research and education to foster positive change in society.

In summary, Dr. Manzoor E. Chowdhury's research focus encompasses a broad spectrum of applied economics, from global investments and economic forecasting to sustainable development and poverty alleviation. His work not only enriches the academic discourse in economics and management but also contributes tangible solutions to some of the most pressing economic and environmental challenges of our time.
